

Intel Acquires Mobileye in Anticipation of First Major Wave of Sales for Self-Driving Cars in 2021, Says TrendForce

2017-03-14 [TrendForce](#)

TrendForce states that after the merger, Intel will be able to combine its hardware products such as high-performance computing chips and IoT solutions with Mobileye's image processing algorithms for autonomous driving systems. The deal gives Intel's the potential to develop an autonomous driving solution that incorporates cloud computing. Furthermore, the deal strengthens Intel's collaboration with BMW to bring self-driving cars to the market in 2021, when first wave of sales for such vehicles is anticipated to take place in major auto markets worldwide.

Branded auto makers and Tier 1 system suppliers have been using image processing algorithms and other innovations provided by Mobileye

Intel to focus on its self-driving car venture with BMW after taking Mobileye under its wings

About TrendForce

TrendForce is a global provider of the latest development, insight, and analysis of the technology industry. Having served businesses for over a decade, the company has built up a strong base membership base of 435,000 subscribers. TrendForce has established a reputation as an organization that offers insightful and accurate analysis of the technology industry through five major research divisions: DRAMXchange, WitsView, LEDinside, EnergyTrend and Topology. Founded in Taipei, Taiwan in 2000, TrendForce has extended its presence in China since 2004 with offices in Shenzhen and Beijing. For more details about TrendForce, please visit www.trendforce.com

Major research divisions:

DRAMeXchange focuses on memory, storage and the consumer electronics industry including PC DRAM, Mobile DRAM, Server DRAM, NAND Flash, SSD and smartphone.

WitsView offers comprehensive coverage of the display industry from upstream components, midstream panels/touch modules to downstream system integrators, brands and channels.

LEDinside covers all aspects of the LED supply chain from upstream equipment/materials, midstream chip/packaging to the downstream backlight and lighting market.

EnergyTrend specializes in green energy research, such as solar energy, lithium battery, energy storage systems and xEVs.

Topology studies structural trends of technology industries in the Greater China Region and beyond, focusing on semiconductors, photovoltaic technology, telecommunications, and IA.
