

TrendForce Anticipates Global Server DRAM ASP in 2Q17 to Rise Over 10% From Prior Quarter as Demands Exceeds Supply

2017-04-18 [Mark Liu](#)

DRAMeXchange, a division of [TrendForce](#), reports that demand continues to outpace supply in the server DRAM market. In this first quarter, memory suppliers saw their shipment fulfillment rates dropped for different groups of clients. The fulfillment rate for long-term agreement (LTA) orders was 80% on average, while fulfillment rates for orders from Chinese and Taiwanese ODMs fell to the 60% level. Due to the persistent undersupply, DRAMeXchange further projects that the global average sales price (ASP) of server DRAM will increase by more than 10% between the first and second quarter.

Domestic telecom industry and BAT will increase their take of China's server shipments to 36% this year

About TrendForce

TrendForce is a global provider of the latest development, insight, and analysis of the technology industry. Having served businesses for over a decade, the company has built up a strong base membership base of 435,000 subscribers. TrendForce has established a reputation as an organization that offers insightful and accurate analysis of the technology industry through five major research divisions: DRAMXchange, WitsView, LEDinside, EnergyTrend and Topology. Founded in Taipei, Taiwan in 2000, TrendForce has extended its presence in China since 2004 with offices in Shenzhen and Beijing. For more details about TrendForce, please visit www.trendforce.com

Major research divisions:

DRAMeXchange focuses on memory, storage and the consumer electronics industry including PC DRAM, Mobile DRAM, Server DRAM, NAND Flash, SSD and smartphone.

WitsView offers comprehensive coverage of the display industry from upstream components, midstream panels/touch modules to downstream system integrators, brands and channels.

LEDinside covers all aspects of the LED supply chain from upstream equipment/materials, midstream chip/packaging to the downstream backlight and lighting market.

EnergyTrend specializes in green energy research, such as solar energy, lithium battery, energy storage systems and xEVs.

Topology studies structural trends of technology industries in the Greater China Region and beyond, focusing on semiconductors, photovoltaic technology, telecommunications, and IA.
