

TrendForce Says More Than Half of Global Server Demand Will Come From Data Centers in 2020 and Intel Will Be Long-Term Leader of Server Processors

2017-05-17 [Mark Liu](#)

DRAMeXchange, a division of [TrendForce](#). Though AMD and Qualcomm transitioned to the more cutting-edge manufacturing technologies such as the 14nm and the 10nm processes for their server solutions towards the end of last year, they will not be able to expand their market shares significantly in the short term. Intel's competitors are still behind in developing third-party hardware and software support.

AMD's Naples has a chance to break into the mid-range segment of the server processor market; Intel's Purley targets high-performance computing

Compuforum 2017 on May 31 at Taipei International Convention Center (TICC). The theme of the seminar is "The Innovation of Cloud Computing and Storage Technology." For more information about the event, please visit:

About TrendForce

TrendForce is a global provider of the latest development, insight, and analysis of the technology industry. Having served businesses for over a decade, the company has built up a strong base membership base of 435,000 subscribers. TrendForce has established a reputation as an organization that offers insightful and accurate analysis of the technology industry through five major research divisions: DRAMXchange, WitsView, LEDinside, EnergyTrend and Topology. Founded in Taipei, Taiwan in 2000, TrendForce has extended its presence in China since 2004 with offices in Shenzhen and Beijing. For more details about TrendForce, please visit www.trendforce.com

Major research divisions:

DRAMeXchange focuses on memory, storage and the consumer electronics industry including PC DRAM, Mobile DRAM, Server DRAM, NAND Flash, SSD and smartphone.

WitsView offers comprehensive coverage of the display industry from upstream components, midstream panels/touch modules to downstream system integrators, brands and channels.

LEDinside covers all aspects of the LED supply chain from upstream equipment/materials, midstream chip/packaging to the downstream backlight and lighting market.

EnergyTrend specializes in green energy research, such as solar energy, lithium battery, energy storage systems and xEVs.

Topology studies structural trends of technology industries in the Greater China Region and beyond, focusing on semiconductors, photovoltaic technology, telecommunications, and IA.
