

TrendForce Says Mobile DRAM Revenue Grew 14.8% Sequentially in Second Quarter and Will Keep Climbing in Third Quarter

2017-08-23 [TrendForce](#)

DRAMeXchange, a division of [TrendForce](#), reports that the global mobile DRAM market experienced some recovery during the second quarter, though smartphone sales remained sluggish. Smartphone brands had lowered their annual production volume targets in the first quarter and in turn faced inventory pileup for memory components. However, the situation later improved in the second quarter and stock-up demand returned.

Top three DRAM suppliers will see further increases in profits during third quarter as the recovery of the smartphone market leads to an uptick in contract prices

About TrendForce

TrendForce is a global provider of the latest development, insight, and analysis of the technology industry. Having served businesses for over a decade, the company has built up a strong base membership base of 435,000 subscribers. TrendForce has established a reputation as an organization that offers insightful and accurate analysis of the technology industry through five major research divisions: DRAMXchange, WitsView, LEDinside, EnergyTrend and Topology. Founded in Taipei, Taiwan in 2000, TrendForce has extended its presence in China since 2004 with offices in Shenzhen and Beijing. For more details about TrendForce, please visit www.trendforce.com

Major research divisions:

DRAMeXchange focuses on memory, storage and the consumer electronics industry including PC DRAM, Mobile DRAM, Server DRAM, NAND Flash, SSD and smartphone.

WitsView offers comprehensive coverage of the display industry from upstream components, midstream panels/touch modules to downstream system integrators, brands and channels.

LEDinside covers all aspects of the LED supply chain from upstream equipment/materials, midstream chip/packaging to the downstream backlight and lighting market.

EnergyTrend specializes in green energy research, such as solar energy, lithium battery, energy storage systems and xEVs.

Topology studies structural trends of technology industries in the Greater China Region and beyond, focusing on semiconductors, photovoltaic technology, telecommunications, and IA.
