

Mobile DRAM Prices to Go Up by 10~15% in 4Q17 as Seasonal Demand Picks Up and Suppliers Seek to Correct Price Differences Among Applications

2017-10-12 [TrendForce](#)

DRAMeXchange, a division of [TrendForce](#), estimates that mobile (LPDDR) DRAM products will see sequentially quarterly price increases in the average range of 10~15% in the fourth quarter of 2017. This price hike is attributed to DRAM suppliers seeking to correct price differences among various applications as well as the year-end busy season in the smartphone market. The percent of sequential price increase for mobile DRAM in the fourth quarter is expected to be the largest when compared with percent increases for DRAM used in other applications.

Growth of memory content in smartphones during next year will be driven mainly by hardware upgrades of low-end and mid-range models

About TrendForce

TrendForce is a global provider of the latest development, insight, and analysis of the technology industry. Having served businesses for over a decade, the company has built up a strong base membership base of 435,000 subscribers. TrendForce has established a reputation as an organization that offers insightful and accurate analysis of the technology industry through five major research divisions: DRAMXchange, WitsView, LEDinside, EnergyTrend and Topology. Founded in Taipei, Taiwan in 2000, TrendForce has extended its presence in China since 2004 with offices in Shenzhen and Beijing. For more details about TrendForce, please visit www.trendforce.com

Major research divisions:

DRAMeXchange focuses on memory, storage and the consumer electronics industry including PC DRAM, Mobile DRAM, Server DRAM, NAND Flash, SSD and smartphone.

WitsView offers comprehensive coverage of the display industry from upstream components, midstream panels/touch modules to downstream system integrators, brands and channels.

LEDinside covers all aspects of the LED supply chain from upstream equipment/materials, midstream chip/packaging to the downstream backlight and lighting market.

EnergyTrend specializes in green energy research, such as solar energy, lithium battery, energy storage systems and xEVs.

Topology studies structural trends of technology industries in the Greater China Region and beyond, focusing on semiconductors, photovoltaic technology, telecommunications, and IA.
