

UMC Won the Preliminary Injunction against Micron in China; Global Memory Market Is Very Likely to See Reshuffle, Says TrendForce

2018-07-04 [TrendForce](#)

DRAMeXchange, a division of [TrendForce](#), expects that the global memory market may have a reshuffle if the judgment is enforced and other Chinese memory suppliers enter the market next year.

rd not only banned the sales of some Micron-branded and Crucial-branded products in China, but also ordered Micron's IC assembly/testing plant in Xi'an to halt operation; Micron Technology (Shanghai) Co., Ltd. has also been ordered to cease sales. The judgment will have significant impacts on the sales of products under Micron's own brand or the Crucial brand in China. Moreover, the businesses of Micron's downstream partners would also be affected.

About TrendForce

TrendForce is a global provider of the latest development, insight, and analysis of the technology industry. Having served businesses for over a decade, the company has built up a strong base membership base of 435,000 subscribers. TrendForce has established a reputation as an organization that offers insightful and accurate analysis of the technology industry through five major research divisions: DRAMXchange, WitsView, LEDinside, EnergyTrend and Topology. Founded in Taipei, Taiwan in 2000, TrendForce has extended its presence in China since 2004 with offices in Shenzhen and Beijing. For more details about TrendForce, please visit www.trendforce.com

Major research divisions:

DRAMeXchange focuses on memory, storage and the consumer electronics industry including PC DRAM, Mobile DRAM, Server DRAM, NAND Flash, SSD and smartphone.

WitsView offers comprehensive coverage of the display industry from upstream components, midstream panels/touch modules to downstream system integrators, brands and channels.

LEDinside covers all aspects of the LED supply chain from upstream equipment/materials, midstream chip/packaging to the downstream backlight and lighting market.

EnergyTrend specializes in green energy research, such as solar energy, lithium battery, energy storage systems and xEVs.

Topology studies structural trends of technology industries in the Greater China Region and beyond, focusing on semiconductors, photovoltaic technology, telecommunications, and IA.
