

x86 Server CPUs Remain Market Mainstream, 7nm Platform May Help AMD to Increase Market Share, Says TrendForce

2018-11-28 [Mark Liu](#)

DRAMeXchange, a division of [TrendForce](#), notes that x86 continues to be the mainstream architecture for server CPUs this year, with Intel and AMD being the market leaders. Particularly, Intel dominantly represents around 98% of the total server CPU shipments worldwide in 2018. For the next year, the market share of AMD x86 server CPUs is expected to go up to 5%, after the company's introduction of 7nm CPUs to the market.

Purley Gen 2 remains in 14nm process, AMD 7nm solutions may be released in 2H19

About TrendForce

TrendForce is a global provider of the latest development, insight, and analysis of the technology industry. Having served businesses for over a decade, the company has built up a strong base membership base of 435,000 subscribers. TrendForce has established a reputation as an organization that offers insightful and accurate analysis of the technology industry through five major research divisions: DRAMXchange, WitsView, LEDinside, EnergyTrend and Topology. Founded in Taipei, Taiwan in 2000, TrendForce has extended its presence in China since 2004 with offices in Shenzhen and Beijing. For more details about TrendForce, please visit www.trendforce.com

Major research divisions:

DRAMeXchange focuses on memory, storage and the consumer electronics industry including PC DRAM, Mobile DRAM, Server DRAM, NAND Flash, SSD and smartphone.

WitsView offers comprehensive coverage of the display industry from upstream components, midstream panels/touch modules to downstream system integrators, brands and channels.

LEDinside covers all aspects of the LED supply chain from upstream equipment/materials, midstream chip/packaging to the downstream backlight and lighting market.

EnergyTrend specializes in green energy research, such as solar energy, lithium battery, energy storage systems and xEVs.

Topology studies structural trends of technology industries in the Greater China Region and beyond, focusing on semiconductors, photovoltaic technology, telecommunications, and IA.
