

Shipments of Large-Size Panels to Grow by 1% YoY in 2019 Driven by Specs Improvements, Says TrendForce

2019-01-03 [Iris Hu](#)

WitsView, a division of [TrendForce](#), shipments of large-size panels reached 804.06 million pieces in 2018, a YoY growth of 2.5%. Among all the large-size display panel applications, only tablet panel recorded decreasing shipments last year, while other categories registered noticeable growth. The segment of TV panel was driven by new production capacity in the industry and special deal projects, while the LCD monitor segment grew due to the increased production volume of borderless monitors and momentum from global sports events. As for notebook panels, notebook manufacturers started their stock-ups earlier than previous years, in fear of the shortage of components like driver ICs. As a result, the notebook panel shipments for 2018 increased as well.

About TrendForce

TrendForce is a global provider of the latest development, insight, and analysis of the technology industry. Having served businesses for over a decade, the company has built up a strong base membership base of 435,000 subscribers. TrendForce has established a reputation as an organization that offers insightful and accurate analysis of the technology industry through five major research divisions: DRAMXchange, WitsView, LEDinside, EnergyTrend and Topology. Founded in Taipei, Taiwan in 2000, TrendForce has extended its presence in China since 2004 with offices in Shenzhen and Beijing. For more details about TrendForce, please visit www.trendforce.com

Major research divisions:

DRAMeXchange focuses on memory, storage and the consumer electronics industry including PC DRAM, Mobile DRAM, Server DRAM, NAND Flash, SSD and smartphone.

WitsView offers comprehensive coverage of the display industry from upstream components, midstream panels/touch modules to downstream system integrators, brands and channels.

LEDinside covers all aspects of the LED supply chain from upstream equipment/materials, midstream chip/packaging to the downstream backlight and lighting market.

EnergyTrend specializes in green energy research, such as solar energy, lithium battery, energy storage systems and xEVs.

Topology studies structural trends of technology industries in the Greater China Region and beyond, focusing on semiconductors, photovoltaic technology, telecommunications, and IA.
