

Decline in Q4 DRAM Contract Prices Lessens as Buying Momentum Recovers, Says TrendForce

2019-11-11 [TrendForce](#)

DRAMeXchange research division of [TrendForce](#), Q4 DRAM ASP is as of yet undergoing a slight QoQ decline, but this decline has shrunk down to 5%. In contrast, the total trading volume in October has seen considerable QoQ growth, which demonstrates an increased willingness to pay on the purchasers' part. Once suppliers' inventory levels have sufficiently lowered, they will no longer need to cut prices to encourage further sales. These factors have the potential to help DRAM prices stabilize and recover in 2020.

Spot market has slackened recently and seen prices reach new lows this year

About TrendForce

TrendForce is a global provider of the latest development, insight, and analysis of the technology industry. Having served businesses for over a decade, the company has built up a strong base membership base of 435,000 subscribers. TrendForce has established a reputation as an organization that offers insightful and accurate analysis of the technology industry through five major research divisions: DRAMXchange, WitsView, LEDinside, EnergyTrend and Topology. Founded in Taipei, Taiwan in 2000, TrendForce has extended its presence in China since 2004 with offices in Shenzhen and Beijing. For more details about TrendForce, please visit www.trendforce.com

Major research divisions:

DRAMeXchange focuses on memory, storage and the consumer electronics industry including PC DRAM, Mobile DRAM, Server DRAM, NAND Flash, SSD and smartphone.

WitsView offers comprehensive coverage of the display industry from upstream components, midstream panels/touch modules to downstream system integrators, brands and channels.

LEDinside covers all aspects of the LED supply chain from upstream equipment/materials, midstream chip/packaging to the downstream backlight and lighting market.

EnergyTrend specializes in green energy research, such as solar energy, lithium battery, energy storage systems and xEVs.

Topology studies structural trends of technology industries in the Greater China Region and beyond, focusing on semiconductors, photovoltaic technology, telecommunications, and IA.
